Illuminating Glassware

With Hangers

Designed for the Lighting of—

Stores

Offices

Hotels

Restaurants

Club Rooms

Churches

Auditoriums

Schools

The latest types of Inland Units are included in this catalog together with some of their well-known standard shapes of globes which are also shown in the regular Inland "Illuminating Glassware" Catalog.

In this issue all globes are listed and priced complete with hangers. The glassware is also listed separately.

Inland Glass Works, Inc.

6101 West 65th St.

Chicago, Ill.

Foreword

If we were asked to name the most important reason for the outstanding success of Inland Illuminating Glassware, it would be that quality has always been uppermost in our minds at all times.

There have been and still are endless changes being made in design, color decorations, etc., but through them all quality of Inland glass is of the highest and insures efficient, effective lighting. Some of Inland's contributions to the Illuminating glassware industry are the:

INLAND SNOW WHITE GLASS — a pure white glass of the finest texture, having diffusing qualities that provide efficient illumination without glare. Even when not lighted, this glass offers a handsome appearance.

INLAND ALABASTER OR CASED GLASS — produced in two layers and in addition to being exceptionally fine in color is highly efficient from the illuminating standpoint.

INLAND CRACKLED GLASS — furnished in a rich amber color or plain sparkling crystal.

The beauty of Inland illuminating glassware is brought out by correct designing and decorating. It meets the requirements for good lighting. We invite you to inspect the latest Inland units on the pages following.

The "Tillsonian" Clear Top

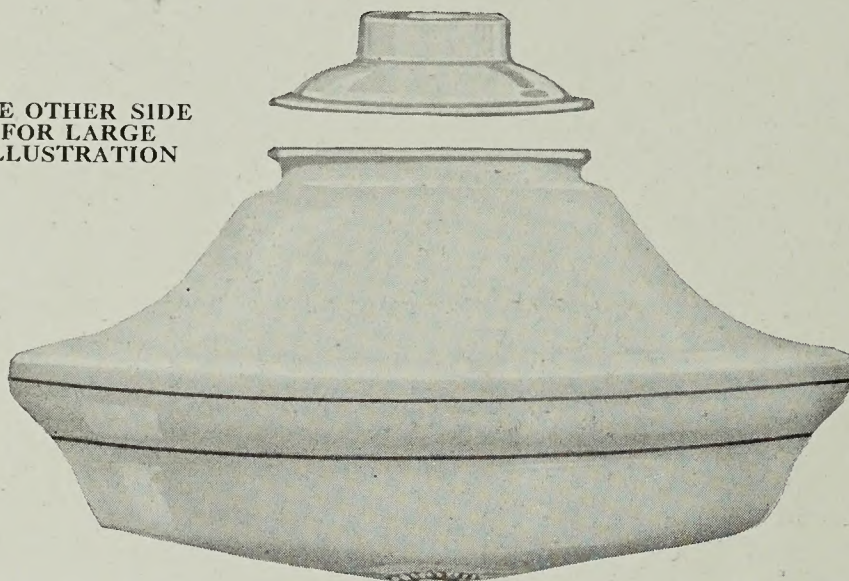

This Luminaire has been scientifically designed for the semi-indirect illumination of Offices, Stores, Schools, Hospitals, etc. The clear top feature provides a uniform distribution of light to the ceiling and side walls, while the direct downward light is subdued, eliminating all glare and eye strain.

Dec. 504—Consists of two bands and bottom rosette in Tan on Amber Enamel background.

GLASS SOLD ONLY COMPLETE WITH HANGER

If Decorated Globes are made in several colors, the color wanted must be specified.

DESCRIPTION OF GLASS

The Tillsonian consists of two pieces of glass. The lower bowl is of heavily enameled crystal glass in either white or amber, permitting only a small portion of light for direct illumination. The upper portion of the bowl is only slightly diffusing, allowing approximately 60% of the light to be reflected from ceiling and side walls.

The glass diffusing neck, which sets into the fitter of the hanger, is also a crystal diffusing glass and allows all the light from the lamp to be utilized and prevents ceiling shadows.

DESCRIPTION OF HANGER

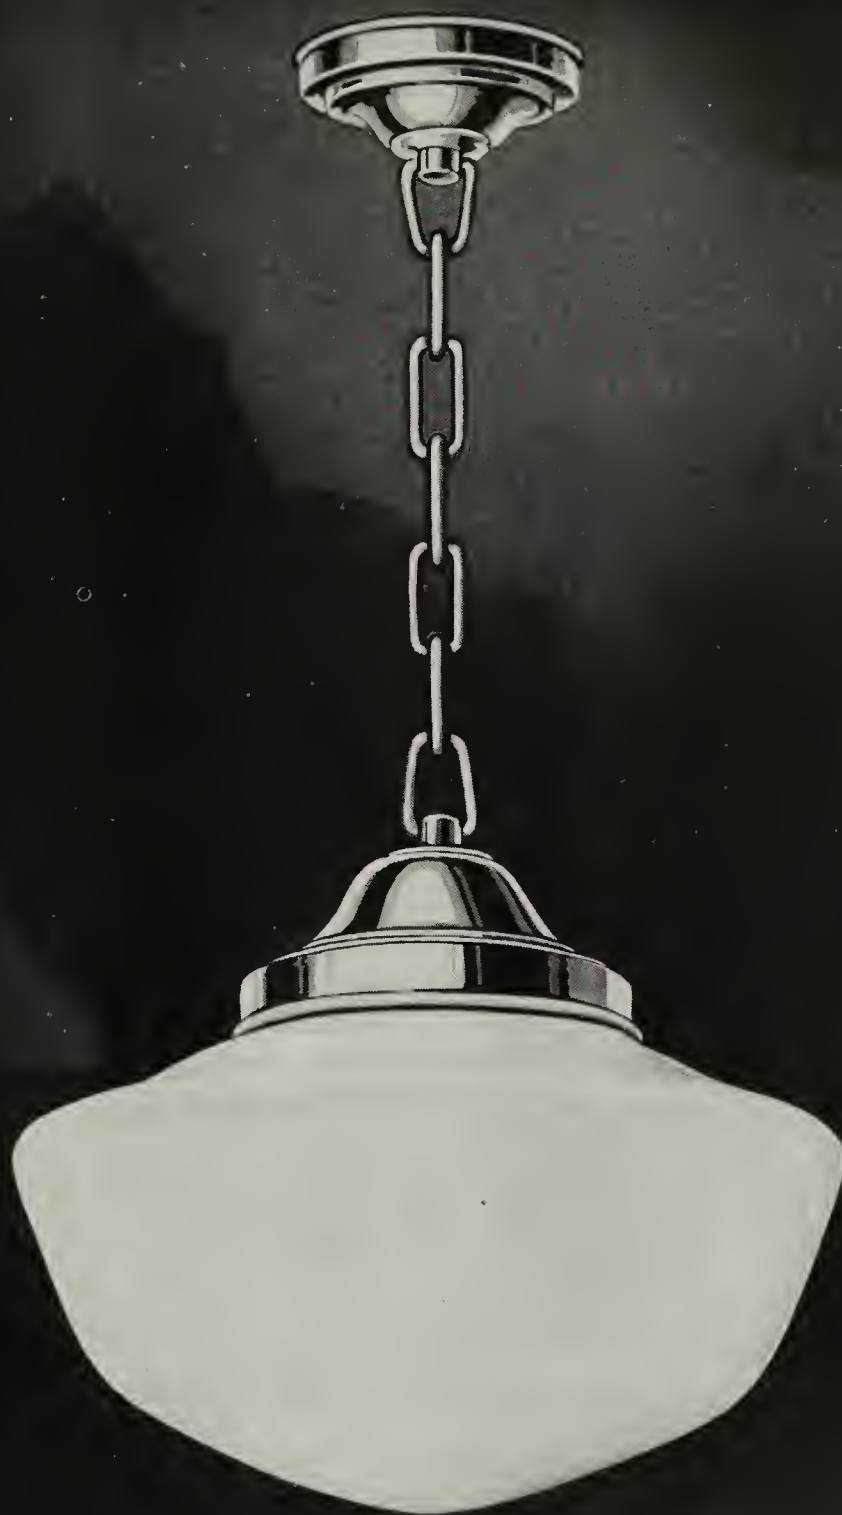

MADE ONLY IN STEM TYPE.

The special hanger is a pipe covered with brass tubing plated a statuary bronze buffed and polished. 24" length overall. The canopy has a swivel joint assuring perfect hanging alignment. Furnished with No. 16 slow burning wire, mogul or standard socket.

Specify socket desired when ordering.

INSTRUCTIONS

1. In ordering always give specific description, order number, etc. When items are furnished in colors, state kind desired. When globes with hangers are ordered the catalog numbers of each item must be given.
2. State on order how goods are to be shipped — freight, express, etc.
3. Our receipt from the Railroad Company showing that goods have been received by them in good condition relieves us of any further responsibility as they assume all responsibility for the delivery of the goods and the condition of same on arrival at destination.
4. New accounts are solicited on a credit basis, houses who have no credit rating with commercial agencies are required to give at least three references and copy of last financial statement available. In order to expedite the first order, we suggest that you instruct us to ship C.O.D. Such orders must be accompanied with a check amounting to 25% of the order.
